

WELCOME TO AUSTIN

Ruben Rathnasingham, PhD  
Dell Medical School @ UT Austin

# Growing a health innovation-related economy

# What makes us different?

- **Built on the foundation of a Tier 1 research university**  
(the first medical school in nearly 50 years built at an AAU/Association of American Universities member school)
- **Unprecedented partnership with our community**  
(\$35 million annual investment by Travis County taxpayers)

# What does that mean?

- **Likely a long time, if ever**  
*before another AMC/Tier 1 Research*
- **Opportunity to start from scratch**  
*groundbreaking curriculum, diverse team, no bad habits or old ways of doing things*
- **Medical School as change agent**  
*focus on measurably improving health in our community*
- **Redefine the model of academic medicine**  
*changing the business model*

# Mission

Revolutionize the way people get and stay healthy by:

- Educating leaders who transform health care;
- Evolving new models of person-centered, multidisciplinary care that reward value;
- Advancing innovation from discovery to outcomes;
- Improving health in our community as a model for the nation; and
- Redesigning the academic health environment to better serve society.

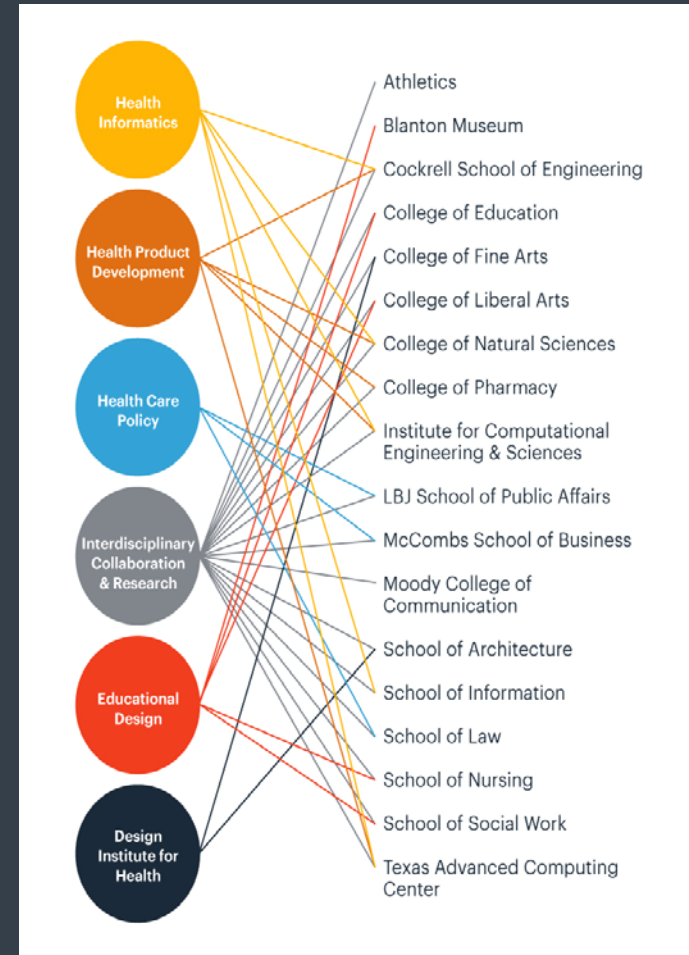

# Leadership & Expertise

- ✓ Department of Population Health
- ✓ Design Institute for Health
- ✓ Institute for Value in Health & Care
- ✓ Surgery & Perioperative Care
- ✓ Women's Health
- ✓ Pediatrics
- ✓ Medicine
- ✓ Psychiatry
- ✓ Diagnostics
- ✓ Neurology
- ✓ Cancer

# Campus Partnerships

- Design Institute for Health (College of Fine Arts)
- Texas Health Catalyst (Schools of Engineering, Natural Sciences, Pharmacy, and OTC)
- Alan Alda Institute at Stony Brook University (Moody)
